EDUCATION

Sri Vani Education centre, Bengaluru
10th Std – 88.88%

2019 - 2020

Sri Chaitanya PU College, Bengaluru
11th Std – 90%
12th Std – 85%

2020 - 2022

Garden City University, Bengaluru
Bachelor of Engineering in **Cyber Security**
8.8 / 10 CGPA

2022–2026

EXPERIENCE

Emporis - Dec 2025 – Jan 2026 (On – site)

Position – HR Executive

- Streamlined employee onboarding and HR documentation processes, improving **process efficiency by 20%**.
- Coordinated recruitment activities and candidate communication, reducing **hiring turnaround time by 15%**.
- Managed employee queries and stakeholder coordination, improving **response and issue-resolution efficiency by 25%**.
- Maintained employee records and HR workflows with 98% accuracy, ensuring timely documentation and process compliance.
- Collaborated with **senior managers on group strategy planning**, supporting discussions around organizational priorities, execution, and business objectives.

Elevated Leaders Club — (Remote)

Associate – Product Management & Technology | Aug 2025 – Nov 2025

- Created and maintained L1–L3 product documentation, feature specifications, and process flowcharts, improving requirements clarity and cross-functional handoffs.
- Supported feature planning and product strategy by evaluating feasibility, implementation impact, dependencies, and risks in collaboration with technical teams.
- Collaborated with developers to validate product features and APIs through integration, functional, and manual testing using Postman across web and mobile platforms.
- Supported client onboarding, product demonstrations, and webinars, translating product capabilities into clear, user-focused communication.
- Bridged product, engineering, and business teams to support smooth execution, resolve requirements gaps, and improve product delivery workflows.
- Created product and marketing visuals using Canva to support product launches, client communication, and product adoption.

SKILLS

Product: Product Documentation, Requirements Analysis, Feature Planning, User Flows, Product Strategy, Client Onboarding, Product Demos, Agile/Scrum

Analytics & Data: SQL, Product Analytics, Data Analysis

Technical: JavaScript, TypeScript, React, Next.js, Node.js, PostgreSQL, Firebase

Tools: Jira, Postman, Git, GitHub, Canva

AI: OpenAI API, Gemini API

CERTIFICATIONS

JUNIOR CYBER SECURITY ANALYST
STRATEGIC MANAGEMENT

NETWORK SUPPORT AND SECURITY
AWS AND DNS

PROJECTS

Quantic Daily —

- Built and deployed an AI-powered newsletter platform using **Next.js 15, React 19, TypeScript, Tailwind CSS 4**, achieving 100% mobile responsiveness and **35% faster load times**.
- Automated newsletter generation **via Node.js scripts, Google Gemini 1.5 Flash**, and **GitHub Actions CI/CD**, cutting manual work by 80%.
- Integrated Firebase **Firestore** for secure subscription management with token-based unsubscribe, ensuring 100% compliance.
- Configured SMTP (Gmail)-based delivery with 98% email reliability and monitored engagement analytics to boost open rates by **25%**.
- Designed and delivered an end-to-end product integrating **AI automation, user subscriptions, analytics, and automated delivery workflows**.

Test-App-Generator —

- Built an **AI-powered Test Case Generator** using **React, Node.js, GitHub OAuth, and OpenAI API**, automating **Jest test creation** from repositories and improving developer productivity by **75%** through reduced manual test writing.
- Integrated **one-click workflow** for secure GitHub login, auto-detection of .js files, and instant unit-test generation, increasing **test coverage by 40%** and enabling early defect detection. Enhanced CI/CD pipelines with **automated PR creation and branch management**, ensuring **streamlined integration and faster QA cycles**.
- Optimized backend requests and frontend rendering to handle large repositories efficiently, reducing generation **latency by 30%**.

Bug Detector –

- Created a professional, software-only camera detection system using **React, TypeScript, TailwindCSS, and WebRTC**, providing real-time scanning for hidden or suspicious cameras
- Developed a detection results panel displaying timestamps, detection types, and location data, enhancing user safety and transparency. Leveraged React state management and **TypeScript** type safety to ensure accuracy and responsiveness. Designed a scalable **Node.js/Express** backend for detection logging and future integration of IR and anomaly detection, improving system reliability and scalability.
- Conducted performance testing across multiple devices and browsers to ensure real-time responsiveness under varied conditions.

ACHIEVEMENTS

Beauty Blog with AI Chatbot —

- Developed a beauty blog platform featuring an **AI chatbot dermatologist** that delivered personalized skincare advice based on user inputs and concerns.
- Built using **C++, HTML, and CSS**, integrating content, chatbot interaction, and e-commerce modules for a seamless user experience.
- Added an online store for accessories and clothing, boosting user engagement and increasing average session time by 45% during demos.
- Presented the project at the **G20 Innovation Competition**, recognized for combining AI-based personalization with a functional front-end store interface.

EXTRACURRICULARS

Sandbox Hackathon (Dayanand Sagar) —

- Built **Metamorph**, a privacy-focused Android app using **Android SDK, Google Maps API, and Java**, designed to remove and modify photo metadata before sharing.
- Implemented metadata editing and deletion for sensitive fields such as location, date, and time, enhancing user **data security by 75%**.
- Reduced personal information leakage **risks by 65%** through automated sanitization of media files prior to upload.
- Designed an intuitive, lightweight UI that improved user task efficiency by 40%, promoting secure digital sharing habits.

Hack-Nocturne 2025 (SMVIT College) —

- Developed **TalentMatch-AI**, a centralized recruitment platform using **Next.js, Tailwind CSS, Firebase, Flask, and OpenAI API** for AI-driven resume–job matching.
 - Increased shortlisting efficiency by 65% by automating resume parsing, ranking, and job-fit scoring using AI-based NLP.
 - Implemented secure resume uploads and storage with Firebase Storage and Flask backend, reducing manual screening workload by 70%.
 - Built an automated SMTP email notification system for real-time recruiter and candidate updates, improving communication **speed by 50%**.
-
